Call for Graduate Student Posters

The Institute for Mathematical Sciences (IMS) at the National University of Singapore invites proposals for posters to be presented in poster sessions during a thematic program entitled

Financial Time Series Analysis: High-dimensionality, Non-stationarity and the Financial Crisis

to be held at the IMS, 1-22 Jun 2012. The website for the program is at http://www2.ims.nus.edu.sg/Programs/012hidim/. The poster sessions are planned for 11-15 Jun 2012.

Aim: The organizing committee is delighted to announce a call for Graduate Student Posters. The aim of this activity is to provide a platform for graduate students, who are working in the area of financial time series (in particular: stationary and non-stationary modelling of low- and high-dimensional financial time series), to communicate and discuss their work with world-leading experts.

Submission: The candidates should submit a title and abstract for their posters in the Word or PDF format to Ms. Claire TAN (imstlf@nus.edu.sg) via email by **15 May 2012**. Acceptance notification will be made from 31 Jan 2012 on a rolling basis.

Poster Guidelines: Posters or presentation material must not exceed 70cm x 100cm. Posters must include the following information: Name, Organization and Email. IMS will provide a 70cm x 100cm poster display panel to each presenter.

Important Notes: All posters will automatically participate in a competition for the best poster. Program attendees will be invited to vote for the best poster, and the result will be announced on the program website.

Poster presenters are expected to be available for the duration of their poster session to be able to discuss their work with other program attendees.
